Apple devices only - My device auto connected but I can't call or stream Bluetooth content

Laura - 2020-11-03 - Highway H260DBI/ H240DI

If you go out of range with your device the phone can lose its ability to stream audio. This will also affect you making or receiving calls.

If this happens to you then connection can be reset by powering your Highway 260DBi down for 20 seconds or selecting the Highway in your mobile devices Bluetooth settings.
