Does my speaker have an alarm feature?

Laura - 2020-11-03 - General Questions

Your speaker has alarm features through Alexa. When you are signed into Alexa, you can request to set alarms, set reminders or timers, and the speaker will wake and play the alarms or timers at the requested time.

Note: If you intend to use this as your primary alarm, please ensure your device is connected to a Wi-Fi network and powered via USB.
