## How many minutes can I record on my memory card?

Laura - 2021-10-19 - SD/ USB stick Recording/ Playback/ EPG

This greatly depends on the size of the SD card and the 'bit rate' of the radio station you're listening to. Generally it can be assumed that you will obtain roughly 1 minute of music per 1MB (megabyte) of SD card space - i.e. a 128MB SD card should give you roughly 2 hours of recording.
